## PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of experience building end-to-end modules for a multi-tenant Hospital ERP platform (C#, ASP.NET Core Web API, React.js, Oracle) used daily by 8 hospital clients. Delivers features from database to screen: Oracle stored procedures, RESTful APIs, and React pages with entry forms, validation, CRUD and workflows, plus the reporting behind them (220+ server-side PDF reports with styled Excel exports). Experienced supporting parallel client deployments on a shared codebase.

## EXPERIENCE

**Software Developer** | Global Mediklaud (BD) Ltd. *Oct 2022 - Present*

- Engineered end-to-end ERP features (entry forms with validation, CRUD screens, setup pages and workflows) across Pharmacy, OPD, IPD, Diagnostics, HR and other modules using React.js, ASP.NET Core Web API and Oracle.
- Migrated legacy ASP.NET Web Forms pages to React + ASP.NET Core, preserving business rules (e.g. invoice discount calculation), and adapted entry modules between ERP areas (e.g. Pharmacy to Cafeteria purchase receive).
- Developed employee self-service portal features (login/session, leave, attendance, salary, messaging) on the DCCI client deployment (.NET 8 Clean Architecture, PostgreSQL, React 18).
- Delivered 220+ server-side PDF reports (QuestPDF) and a reusable, config-driven Excel export facility (ExcelJS) mirroring each PDF layout (company headers, grouped totals, merged invoice cells).
- Maintained two parallel client deployments (Global and Aster) on a shared ASP.NET Core/React codebase against separate Oracle schemas, keeping behavior consistent across both.
- Standardized UI/UX across modules with shared form, validation and report-action patterns.
- Improved reporting accuracy by validating stored-procedure output and correcting total and percentage calculations.

**Trainee Software Engineer** | Corporate Projukti Limited *Mar 2022 - Sep 2022*

- Developed features across the presentation, business-logic and data layers of ASP.NET Core MVC web applications as part of a collaborative development team.
- Contributed across the full software development lifecycle: requirements analysis, relational database design, and implementation to specification.
- Established a strong foundation in C#, MVC architecture and relational database design.

**Student Trainee (Apprenticeship)** | U S Software Limited *Jan 2021 - Feb 2022*

- Completed a hands-on apprenticeship in C#, ASP.NET Web Forms, HTML5, CSS3 and JavaScript web development.

## SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js
- **Backend:** C#, .NET 8, ASP.NET Core Web API, REST APIs, ASP.NET MVC, Clean Architecture
- **Database:** Oracle Database (PL/SQL, Stored Procedures), PostgreSQL, SQL Server
- **Reporting:** QuestPDF (server-side PDF generation), ExcelJS (styled Excel export)
- **Tools & Environment:** Visual Studio, VS Code, Git, Swagger
- **Languages:** English, Bangla, Hindi

## EDUCATION

**Master of Physics** | Cumilla Victoria Government College *2013 - 2014*

**Bachelor of Physics** | Cumilla Victoria Government College *2009 - 2013*

**HSC** | Mohammadpur Model School & College *2007 - 2009*

## CERTIFICATIONS

**Enterprise Systems Analysis & Design with C#** | IsDB-BISEW Diploma *Oct 2020 - Feb 2022*
