# MD. RAJAUL KARIM

**Software Developer | React.js & ASP.NET Core**

Dhaka, Bangladesh | Phone: +880 1920 451466 | Email: mdrkkiron@gmail.com

LinkedIn: **linkedin.com/in/rajaul-karim-6125a1232** | GitHub: **github.com/Md-Rajaul-Karim**

## PROFESSIONAL SUMMARY

Results-driven **Software Developer with 4+ years of professional experience** designing, building, and deploying enterprise-scale ERP modules and web applications using **React.js, ASP.NET Core Web API, C#, Oracle, and PostgreSQL**. Proven expertise contributing to **20+ ERP modules and delivering 220+ server-side reports** across multi-tenant production healthcare and commercial systems. Experienced in full Software Development Life Cycle (SDLC), legacy modernization (ASP.NET Web Forms to React + .NET Core), Clean Architecture, high-performance database optimization (Oracle PL/SQL), and AI-assisted development tools.

## TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Web Design, Component-Driven UI, AJAX, JSON
- **Backend:** ASP.NET Core Web API, C#, .NET 8, Clean Architecture, RESTful APIs, ASP.NET MVC, ASP.NET Web Forms, Entity Framework Core, Dapper, LINQ
- **Database:** Oracle Database (PL/SQL, Stored Procedures, Functions, Packages, Triggers, Views, Indexes), PostgreSQL, MS SQL Server (T-SQL), Database Optimization
- **Reporting & Export:** QuestPDF (High-Performance Server-Side PDF), ExcelJS (Config-Driven Styled Excel), Telerik Reports, Crystal Reports
- **Tools & DevOps:** Git, GitHub, Visual Studio, VS Code, IIS Web Server, Swagger/OpenAPI, Postman, Electron
- **AI Development Tools:** ChatGPT, Claude, GitHub Copilot, Antigravity

**Core Competencies:** Software Development Life Cycle (SDLC), Object-Oriented Programming (OOP), Clean Architecture, RESTful API Design, Relational Database Modeling, Multi-Tenant Architecture, Legacy Modernization, Agile/Scrum.

## WORK EXPERIENCE

**Software Developer** | **Global Mediklaud (BD) Ltd.** | Dhaka, Bangladesh *Oct 2022 – Present*

- Spearheaded full-stack development of **20+ enterprise ERP modules** including Pharmacy, OPD, IPD, Diagnostics, HR, and Cafeteria using React.js, ASP.NET Core Web API, and Oracle PL/SQL for 8+ hospital client environments.
- Modernized legacy system architecture by migrating ASP.NET Web Forms and Telerik reports to modern React.js and ASP.NET Core Web APIs, ensuring 100% preservation of complex business logic (e.g., dynamic invoice discount calculations) and boosting system responsiveness.
- Architected and delivered **220+ server-side PDF reports** using QuestPDF alongside a reusable, config-driven Excel export framework (ExcelJS) supporting dynamic grouping, company branding, and merged invoice cells.
- Developed employee self-service portal features (authentication, session management, leave approval workflows, biometric attendance, salary slips, messaging) for the DCCI deployment built on **.NET 8 Clean Architecture, PostgreSQL, and React 18**.
- Maintained and synchronized dual production client deployments (Global and Aster) on a shared codebase against distinct Oracle database schemas, ensuring data integrity and zero-downtime releases.
- Optimized Oracle PL/SQL stored procedures and analytical queries, eliminating computational discrepancies in totals/percentages and reducing report execution latency.
- Engineered reusable React component libraries and robust form validation rules adopted across the entire engineering team to standardize UI/UX consistency.

**Trainee Software Engineer** | **Corporate Projukti Limited** | Dhaka, Bangladesh *Mar 2022 – Sep 2022*

- Developed web features across presentation, business logic, and data access layers of ASP.NET Core MVC applications in an agile team environment.
- Participated across the full SDLC: analyzed requirements, designed normalized relational database tables in SQL Server, and developed RESTful API endpoints.
- Conducted code reviews, debugging, and unit testing in C# and SQL to ensure data consistency and system stability.

**Student Trainee (Apprenticeship)** | **U S Software Limited** | Dhaka, Bangladesh *Jan 2021 – Feb 2022*

- Completed an intensive hands-on apprenticeship building web applications using C#, ASP.NET Web Forms, HTML5, CSS3, JavaScript, and MS SQL Server.
- Strengthened foundational expertise in Object-Oriented Programming (OOP), MVC architectural patterns, and relational database schema design.

## PROJECTS

**Multi-Tenant Hospital ERP Platform** | **Core Enterprise Platform** *Global Mediklaud*

*Technologies: React.js, C#, ASP.NET Core Web API, Oracle Database (PL/SQL), IIS, RESTful APIs*

- Comprehensive hospital management ERP serving 8+ active healthcare facilities daily with high transactional reliability and 24/7 availability.
- Engineered core enterprise modules: **Pharmacy** (purchase orders, receive, sales returns, stock ledger), **OPD/IPD** (patient admission, bed allocation, discharge billing), and **Diagnostics** (test orders, sample collection, reporting).
- Developed responsive React data-entry interfaces with rigorous client-side form validation, decreasing data-entry errors across high-frequency front desks.
- Designed and maintained complex Oracle stored procedures and packages handling multi-currency, tax rules, and dynamic discount calculations.
- Implemented robust role-based access control (RBAC), multi-user concurrency handling, and audit trail logging to ensure clinical data compliance.

**Enterprise HRIS & Employee Self-Service Portal** | **DCCI Client Deployment** *Global Mediklaud*

*Technologies: .NET 8, Clean Architecture, PostgreSQL, React 18, RESTful APIs, JWT*

- Engineered an enterprise employee self-service portal utilizing modern Clean Architecture (API, Application, Domain, and Infrastructure layers).
- Implemented complete employee lifecycle modules: secure authentication with JWT session management, leave application & multi-level approval hierarchies, biometric attendance tracking, digital payslips, and internal notifications.
- Structured generic and performant repository patterns with PostgreSQL, optimizing API throughput and query execution times for large workforce datasets.
- Integrated automated notification workflows and structured logging to provide reliable real-time operational visibility.

**Server-Side Reporting & Data Export Engine** | **Enterprise Framework** *Global Mediklaud*

*Technologies: C#, QuestPDF, JavaScript, ExcelJS, Oracle PL/SQL*

- Architected a high-throughput reporting subsystem generating **220+ server-side PDF reports** with QuestPDF, replacing slower legacy reporting tools.
- Engineered a unified, configuration-driven Excel export module using ExcelJS that mirrors PDF layout structures with corporate headers, multi-level grouped sums, and dynamic styling.
- Streamlined document generation pipelines, reducing server memory footprint and export turnaround times.
- Eliminated calculation discrepancies across large transactional datasets by auditing stored procedure aggregations and automated tax/subtotal algorithms.

## EDUCATION

**Master of Science (M.Sc.) in Physics** | Cumilla Victoria Government College *2013 – 2014*

**Bachelor of Science (B.Sc.) in Physics** | Cumilla Victoria Government College *2009 – 2013*

**Higher Secondary Certificate (HSC)** | Mohammadpur Model School & College *2007 – 2009*

## CERTIFICATIONS

**Enterprise Systems Analysis & Design with C#.NET** | IsDB-BISEW IT Scholarship Program (1,100 Hours) *Oct 2020 – Feb 2022*

Intensive professional diploma covering C#, ASP.NET Core, Object-Oriented Programming (OOP), Relational Database Design (SQL Server), Software Architecture, and Enterprise Application Development.

## LANGUAGES

**English** (Professional Working Proficiency) | **Bangla** (Native) | **Hindi** (Conversational)
